BLOCK

OF (GIVE NAME OF PLAT OR ADDITION)

## LEGAL DESCRIPTION OF PROPERTY ON WHICH WATER IS TO BE USED

Beginning at the SE corner of the SW¼NW¼ of Sec. 7, T. 6 N., R. 37 E.W.M., and run thence N 0°05'54" E, along the East line of said subdivision, 685.00 feet; thence S 89°14'48" W, parallel to the South line of said subdivision, 1,363.65 feet to a point in the West line of said subdivision; thence S 0°01'45" W, along the West line of said subdivision, 704.98 feet to a point in the centerline of Cottonwood Road; thence N 88°54'16" E, along said centerline 393.12 feet; thence continue along said centerline, N 88°12'16" E, 970.15 feet to the point of beginning. Subject to easements and servitudes of record. Containing 20.14 acres.

---

**DESCRIPTION OF PROPOSED WORKS**

---

Well, pump, pipeline, irrigation system.

---

**DEVELOPMENT SCHEDULE**

---

BEGIN PROJECT BY THIS DATE:

May 1, 1998

COMPLETE PROJECT BY THIS DATE:

May 1, 1999

WATER PUT TO FULL USE BY THIS DATE:

May 1, 2000

---

---

**PROVISIONS**

---

The casing shall be set or placed at least five (5) feet into the first solid, unfractured, nonporous, nonvesicular basalt flow occurring within the formation the well is finished into. Should the well bore extend into the Grande Ronde Unit, the well shall be constructed so as to effectively and permanently seal the Wanapum from the Grande Ronde formation.

The quantities granted through this authorization are issued less any amounts beneficially used upon these lands under Water Right Claim Nos. 9190 and 9191.

Owing to the proximity of neighboring wells, the applicant is reminded of their responsibility toward same and advised that they may be required to regulate their withdrawal and pumping rate if existing rights are impaired.

Use of water under this authorization shall be contingent upon the water right holder's utilization of up to date water conservation practices and maintenance of efficient water delivery systems consistent with established regulation requirements and facility capabilities.

An approved measuring device shall be installed and maintained in accordance with RCW 90.03.360 and/or WAC 508-64-020 through WAC 508-64-040.

The amount of water granted is a maximum limit that shall not be exceeded and the water user shall be entitled only to that amount of water within the specified limit that is beneficially used and required for the actual crop grown on the number of acres and the place of use specified.

This authorization to make use of public waters of the state is subject to existing rights, including any existing rights held by the United States for the benefit of Indians under treaty or otherwise.

A certificate of water right will not be issued until a final examination is made.

All water wells constructed within the state shall meet the minimum standards for construction and maintenance as provided under RCW 18.104 (Washington Water Well Construction Act of 1971) and Chapter 173-160 WAC (Minimum Standards for Construction and Maintenance of Water Wells).

*This permit shall be subject to cancellation should the permittee fail to comply with the above development schedule and/or fail to give notice to the Department of Ecology on forms provided by that Department documenting such compliance.*

*Given under my hand and the seal of this office at Spokane, Washington,*

*this 5th day of August, 1996.*

BRUCE F. HOWARD, Section Manager

ENGINEERING DATA

OK CAC

The installation of an access port, described in Ground Water Bulletin #1, shall be required prior to issuance of a final certificate of water right. In addition, an airline and pressure gage shall be installed and maintained in operating condition. The pressure gage shall be equipped with a standard tire valve and placed in an accessible location. The airline shall extend from land surface to the top of the pump bowls and the total airline length shall be reported to the Department of Ecology upon completion of the pump system.

A well log of the completed well shall be submitted by the driller to the Department of Ecology within thirty (30) days of completion of this well. This well log shall be complete and all information concerning the static water level in the completed well in addition to any pump test data shall be submitted as it is obtained.

This well shall be left open for inspection upon completion and the Department of Ecology shall be notified in order that a video scan of the completed well can be conducted. One weeks notice shall be given to the Department upon completion of the well and prior to setting of a pump in order to make the necessary arrangements for video scanning.

This authorization to use public waters of the state is classified as a Family Farm Permit in accordance with Chapter 90.66 RCW (Initiative Measure No. 59). This means the land being irrigated under this authorization shall comply with the following definition: Family Farm - a geographic area including not more than 2,000 acres of irrigated agricultural lands, whether contiguous or noncontiguous, the controlling interest in which is held by a person having a controlling interest in no more than 2,000 acres of irrigated agricultural lands in the State of Washington which are irrigated under water rights acquired after December 8, 1977. Furthermore, the land being irrigated under this authorization must continue to conform to the definition of a family farm.

Dear Mr. Nelson:

Enclosed is your Permit No. G3-29702P. We are in receipt of your permit fees in the amount of \$8.05. Under the development schedule contained in the permit, construction work for your project shall be started by May 1, 1998.

Enclosed is a Notice of Beginning of Construction to be submitted to this office when the work is started.

Please read carefully the enclosed instruction sheet, as well as both sides of your permit.

Sincerely,

*Cindy A. Christian*
